

I added an action to the business card in Verse

This action is returning the following event data:

```
{
  "verseApiType": "com.ibm.verse.action.clicked",
  "verseApiData": {
    "actionId": "com.ibm.verse.ext.person.action",
    "context": {
      "currentUser": {
        "id": "200896463",
        "orgId": "200880960",
        "network": null,
        "photoUrl": null,
        "photo": null,
        "displayName": "CN=Tom Van Aken/O=GroupWave",
        "primaryEmail": "tom.vanaken@groupwave.be",
        "primaryPhone": null,
        "primaryAddress": null,
        "mobilePhone": null,
        "jobTitle": null,
        "company": null,
        "website": null,
        "status": null,
        "fax": null,
        "name": {
          "familyName": null,
          "givenName": null,
          "middleName": null,
          "honorificPrefix": null,
          "honorificSuffix": null,
          "formatted": "tom.vanaken@groupwave.be",
          "displayType": null,
          "displayName": "CN=Tom Van Aken/O=GroupWave"
        }
      },
      "tags": null
    },
    "profile": {
      "orgId": null,
      "network": null,
      "photoUrl": null,

```

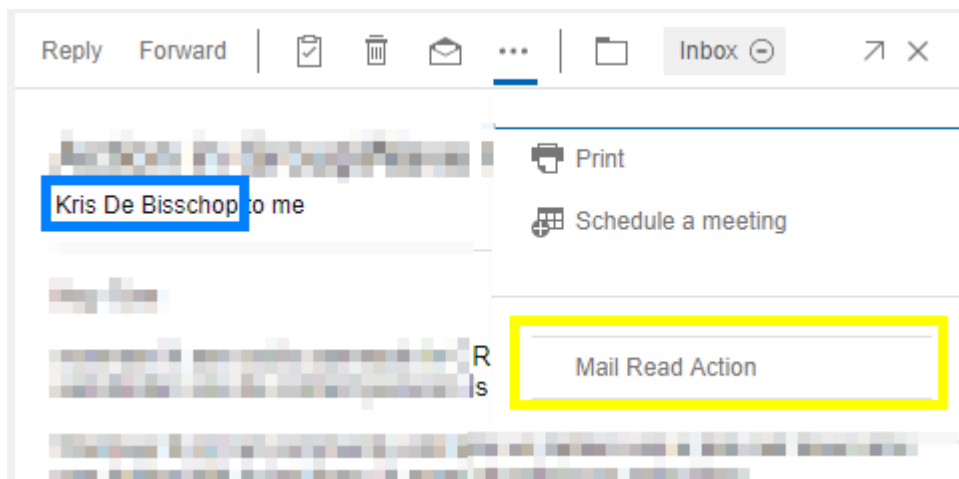

```

    "displayName": [
      "kris.de.bisschop"
    ],
    "primaryEmail": "kris.de.bisschop@groupwave.be",
    "website": null,
    "fax": null,
    "name": {
      "familyName": null,
      "givenName": null,
      "middleName": null,
      "honorificPrefix": null,
      "honorificSuffix": null,
      "displayType": null
    },
    "tags": null
  },
  "type": "com.ibm.appreg.object.person",
  "displayName": [
    "kris.de.bisschop"
  ],
  "emails": [
    {
      "value": "kris.de.bisschop@groupwave.be",
      "primary": true
    }
  ]
}
}
}

```

The name of the person is the business card title (Kris De Bisschop). It should be added to the event data.

The same counts for event data coming from a mail.

The name of the sender (in blue) is known, but not available in the event data
